

Get noticed!

In the fight for the consumers' attention, it is crucial that you stand out in the townscape. A digital façade sign is a very strong eye-catcher, which with its bright colours and sharp contrasts attracts a lot of attention and makes your store stand out in the townscape.

The digital façade sign is built on the same diode technology as soccer perimeter LED displays. It means bright pictures also in daylight.

One sign – many applications

With a digital façade sign you will not only stand out in the townscape, you will also be able to communicate just-in-time messages to your customers directly on the store's façade. You can brand the store, the brands you sell, show pictures of new goods as well as advertise special offers and sales campaigns. The digital façade sign's countless number of applications opens up a whole new way of communicating directly to your customers.

Simple and user-friendly

The software behind our digital façade signs has a simple and user-friendly interface and can be operated either locally or centrally. You decide the number of spots you wish to change between during the

day and you can fast and easy upload a new spot with an up-to-date message. The low production costs on spots for the digital façade sign, make it cost-effective to continuously update the store's spots and thereby is the value of the advertisements further increased.

Based on your needs, we help you design the optimal façade sign, so that it fits the architecture of the building. Then we produce the sign and mount it on the façade.

About digital façade signs

- is based on either LED or SMD technology (diodes)
- has a long lifetime, which enables a long depreciation
- is easy to maintain
